HEAVY DUTY MOBILE COLUMN LIFTING SYSTEMS

## PRODUCTIVITY and PERFORMANCE FEATURES

### FEATURES:

#### BATTERY OPERATED WITH INTERNAL CHARGER AND LIGHTED STATUS DISPLAY

Batteries purchased separately for international use

#### PROTECTED HYDRAULIC CYLINDER ROD

The hydraulic cylinder is inverted inside the carriage and the chrome piston rod is protected from debris and damage. This extends the life of the column and reduces maintenance frequency and cost

#### SPRING LOADED STEERING AND BRAKING SYSTEM

No need to manually operate a pallet jack to move the columns  
- saves precious time every time you move

#### EASY TO MOVE ADJUSTABLE FORKS

Improves set up time without the need for reducer sleeves  
- adjustment range: 9" to 25"

#### TOUGH RUBBER-COATED STEEL WHEELS

Easily roll over dirt and debris that can jolt other lifts to a stop  
- wheels automatically retract under load

#### FORKLIFT POCKETS

Provides a fast and convenient way to relocate columns

#### INNOVATIVE HORSESHOE WIRING

While other mobile column lifts are connected by four cables, the FCH columns use just three (forming a horseshoe), so the front or back of the lift is always open. Vehicles can be driven in and out of the bay without having to disconnect and reconnect cables.
