lift operation with clear
access to one button air
operated lock release

Shown: CR14 with 3 phase new control box
6350 kg. capacity

CR14 Lifts Feature

an improved, advanced hydraulic and mechanical lifting system which is concealed and protected under the runway. This high performance design generates greater durability and a more efficient and dependable lift operation. The CR14 runway lift features an industry-leading rise height of 2000 mm allowing better technician access for under vehicle service.

High Performance Forward Lifts

are rigorously cycle tested at rated load giving you a proven, quality tested lift you can depend on for years of quality service. Forward engineers' gold certified designs meet the highest industry standards for safety and performance. Secure your investment and your bottom line with these versatile and reliable vehicle service lifts.
